P.O. Box 72542 Dar Es salam – Tanzania.
E-mail: vastengineeringservltd@gmail.com
Tel: +255 757 333 187, +255 783 756 751

During operating life of equipment/ Installation system it will be subject to effects of dirt wear, adverse temperature, corrosion, loose terminals, and stress. Unless these are combated, they will individually or in combination efficiency and performance of the equipment/ Installation system eventually leading to failure with possibility of high-cost repair and loss of service.

The primary function of preventive maintenance (Preventive/Specialist) is to ensure that all system/ equipment is always in good working condition so that their performance and efficiency is not imparted.

4.3 Generator, substations, and plants: -

Carrying out installation, testing and commissioning of above-mentioned equipment and switch gears. Normally this involves load study exercise to establish the size of suitable equipment/switch gear with associated cables and other accessories. VESL Electrical Section Corporation Sole are expert in this area.

4.4 Survey of Electrical Installation:

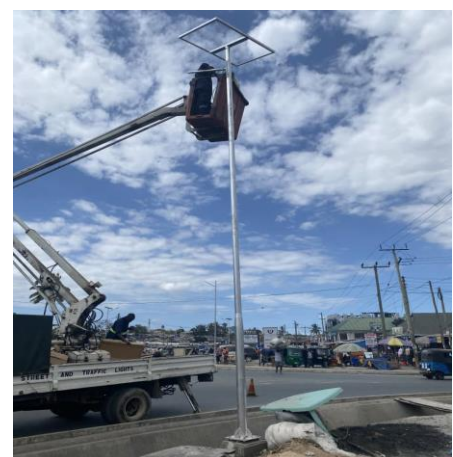

This involves physical check-up and testing of existing system to ascertain its electrical soundness and give recommendations for further steps to be taken.

4.5 Repair of Electrical Machines and Appliances: -

Carrying our repair work of all kinds of electrical machines like washing machines, water pumps, electric cookers, transformers, welding machines, electric iron, Kettle, Refrigeration, Hoovers etc. at a reasonable cost.

4.6 Designing, Installation and Routine Maintenance of Traffic and Street Lights

This involves site visiting, designing, drawing and installation all types of traffic lights and streetlights to trunk, regional and rural roads. Also, for installation of security lights to bus stand yards, hospital surroundings,
